Continuation of Substance of Interview including description of the general nature of what was discussed: It was agreed to cancel claim 8 as not being further limiting since independent claim 1 claims that that the color coating is affixed to at least a portion of only the edge of the lens and since it is only to the edge then it inherently is not affixed to the face of the lens. With reference to claim 9, the examiner stated that claims 9-11 and 15 would be rejected under 35 USC 103 using the combined references above since applicant had not been claiming that the lens was being placed under the ultraviolet heat source after the application of the colored coating. The change to claim 9, as set forth in the examiner's amendment was discussed and agreed upon to overcome these references and place the application in condition for allowance.
